Léna REBOURS

Paris, France | lena.rebours@ens.psl.eu | + 33 6 33 22 47 68 | LinkedIn | Github Portfolio

EDUCATION

École Normale Supérieure (ENS-PSL) & École des Hautes Études en Sciences Sociales (EHESS) **Paris, France**
MSc in Cognitive Sciences | Minor in Data Science | Student Ambassador *2026–Present*

- **Relevant Coursework:** Data Science, Machine Learning, AI, Modelling, Computational Neurosciences, Linguistics
- **Activities:** Active Member, Cognitive Sciences Association; Volunteer, National Women in STEM Association

University of Cambridge **Cambridge, UK**
Summer School | AI & Science Policy · Innovation *August 2026*

- Selected as one of 30 participants worldwide for a week-long residential seminar organized by *Works in Progress* on AI, science, and economic policy, featuring discussions with leading UK policymakers and AI experts
- Gave a lightning talk and competed in a data visualization challenge

Scuola Normale Superiore (SNS) **Pisa, Italy**
Summer School | Digital Philology *July 2026*

- Selected to attend an international residential summer school on computational approaches to textual analysis

University Paris Sciences et Lettres (PSL) & Lycée Louis-le-Grand **Paris, France**
Bachelor of Data Science and Cultural Sciences | Final Grade: 16/20 | GPA: 3.9/4 | Student Ambassador *2023–2026*

- **Relevant Coursework:** Statistics, Algorithms, Machine Learning, NLP, Computational Social Sciences, Computational Art History, Data Engineering, Cultural Evolution

WORK EXPERIENCE

École Normale Supérieure (ENS-PSL) **Paris, France**
Research Intern | AI & Natural Language Processing (NLP) *January 2026–Present*

- First-authored a research paper submitted to an ACL conference with researchers from ENS and Cambridge, investigating LLMs' ability to recover semantic content from syntactic cues in heavily redacted text
- Designed and implemented a 31-condition evaluation pipeline to quantify the effects of 5 linguistic cues on LLM semantic reconstruction, assessing performance through 3 metrics, mixed-effects regression and permutation tests

University of Chicago **Paris, France**
French Language Conversation Assistant *September 2025–Present*

- Lead weekly in-person French workshops for UChicago undergraduates in Paris, reaching 30+ students to date
- Coach fluency, accuracy and pronunciation, and support their cultural immersion in French society

École Normale Supérieure (ENS-PSL) **Paris, France**
Research Intern (UROP) | Data Science & Computational Linguistics *January 2025–July 2025*

- First-authored 2 research papers in preparation for publication on nestedness in linguistic and cultural systems, analyzing 3,020 phonological inventories across 2,186 languages and 70 language families
- Compiled and analyzed 122 large-scale binary matrices across linguistic, archaeological, technological and cultural domains, using 2 nestedness metrics, 8 null models and 1,000 simulations per model and matrix

SELECTED PROJECTS & INITIATIVES

CinéLingua – Cultural Film Recommendation & Language Learning Platform
Machine Learning & Web Development Project

- Built and deployed CinéLingua, a personalized film recommendation platform powered by a dataset of ~1 million TMDB films, offering recommendations tailored to users' tastes and language proficiency across 50+ languages

Econometric Analysis of the Classic Car Market
Co-author | Research paper in preparation for publication

- Built an original dataset of 584 classic cars across 11 auctions and 6 auction houses, extracting 44 variables through manual annotation and NLP, and developed hedonic regression models to identify price determinants

Student Juror for 3 National Cultural Awards
Science Film Award (Pariscience) | National Literature Prize (France Culture) | National Music Award (Prix Joséphine)

- Selected to join 3 in-person student juries in science film, literature and music, attending events, engaging with filmmakers, researchers and industry experts, and deliberating with fellow jurors to determine the award winners

SKILLS & INTERESTS

Programming: Python (NumPy, Pandas, Statsmodels, Matplotlib), R (dplyr, tidyr, ggplot2), SQL, Git/GitHub
Machine Learning: Supervised/unsupervised learning, classification/regression, model evaluation, statistical inference
Data Collection: Survey and questionnaire design, manual annotation, automated web scraping, LLM-assisted annotation
Languages: French (native), English (fluent, C1 IELTS), Spanish (Intermediate, B2), Italian (Lower-Intermediate, A2–B1)
